

My school!

I goes to school in Vingåker at Dammsdal from I was 11 years until I was 16 years. I studied in 6 years for Dammsdal. We were 5 pupils in the class, Smirre, Tom, Anna, Ranja and Daniel.

If we came to late for a lesson we have detention and we started 8:45 and study to 12:00. When that was afternoon we were free to draw, build with Lego, play videogames and watch TV. We studied much about wolves and how we can take care of animals and environment. We had math, woodworks, needlework, writing/drawing, pottery and learn about cleaning, food, hygiene and more. We learned about the World and how that were in different countries.

In the ADL we were in the ADL-flat and learning about making food, cleaning and our own hygiene. My teachers name was Yvonne Nilsson and she was kind, she was for environment and animals rights. We were much in the forest with her and we studied special about wolves and how wolves live and how we can help the wolves and other wild animals. In the class room we had 5 benches and a round table and TV, video and Nintendo to. On the walls was pictures of animals and we had a big box of Lego.

When a pupils behavior was badly the pupil must go out of the classroom and came back later when she/he were calm down.

The lunch and books were free at Dammsdal.

I studied at Norräng when I moved home to Skåne again. So I must pay for books, pencils and diskettes but the lunch was free at Norräng. Some pupils at Norräng liked to bully me and hit me and spit on me for I'm a furrie and I was very sad of that. They works at SIVO to day and bully me on Internet to days very hard. I tell the police about it but the police do nothing to that and I'm afraid of the bullies and think sometimes I will have a gun for defense my self and my family and my furryfriends.
