# Why I want to study!

I will learn my English so I can use English more in Second Life and on FurAffinity. I will travel to other contrys so speak proper English is good too.

My goal to the studies at T4Vux is learn my Englsih so well so I can comes in to Gamedesign at Vetlanda, they have a line for peoples with Aspergers Syndrome if interested in games. I will learn more about Internet and computers so I can set up a server at home and other furries can hosting homepages and furryart and more on my server and I can have a forum, messagesboard and leading games on my server too. For that Farejobaldo tell me I must learn PHP and SQL. It is avancered programmering may can learn at Chalmers or KTH.

At T4Vux I will learn my samhällskunskap too when I is finished with Swedish. I don't know so much about the samhället and myndigheter and how the samhälle is working. My mom always have care o my money and papers from myndigheter, försäkringskassa and kommunen. The only money I self have is my pocketmonney is 800 krowns in moth is to buy some snus and one computergame or movie sometimes. Sometimes I buy models of military aircrafts to my furry Air Force I roleplay about foxes and other animals is fighterpilots and going to war against humans and the vulpine tactic forces of fox Power Rangers. I will do computergames about this soon just like "Call of Duty" but about foxes and other animals if fight against humans.

My background is in särskolan at Dammsdal and Norräng, but from 2000 I have my Asperger diagnose I have study at Komvux, Norra Station, Önnestad folkhögsskola and Furuboda Folkshöögskola there I goes Internetprofile and have blog, hompage, YouTube and more.

But my visions with games and Internet is about furry fandom and animal rights and make games and programs about that. I´m a very engagerad furrie and will build things in cyberspace for the furry fandom.
